History

MS born in the 80s with the purpose to offer mechanical precision machinings, oriented to both customers who need small batches and even medium big batches.

Vision

- Be a valuable partner of the manufacturer, helping them with the realization of mechanical parts needed in their production.

Mission

- Offer mechanical turning and milling processes for the realization of mechanical parts (based on the customer's design) in various materials, guaranteeing maximum quality, delivery on time and competitiveness.

Organization

The company is organized as follow:

- Technical office;
- Planning office;
- Sales & Marketing dept.;
- Production:
 - Milling and drilling department;
 - Turning department;
 - Assembling department;
 - Testing and measurement department for quality control;
- Administration-Finance-Control office;
- Logistic dept.

Organization (follow)

The company rely on a modern IT infrastructure, the management of the main business processes takes place with the help of a modern ERP (NTS Informatica Business).

In particular, in addition to the canonical management of administrative processes, ERP is used for:

- Manage customer orders;

- Manage production orders (job orders);

- Manage the machine loading plan, for the planning of orders and for the scheduling of delivery dates;

- Manage the progress of the orders, with the aid of bar-code readers in the milling and turning departments, in order to have, in real time, the status of the orders and therefore of the customer orders.

MES (Manufacturing Execution System) – Masterfactory (NTS Manufacturing) software for a further upgrade in production management, from a 4.0 perspective.

Services

- Raw material stock (iron, aluminium, steel, etc..);
- Milling and Drilling made on a modern CNC Machines;
- Turning made on modern Turning CNC;
- Carpentry;
- Rectification;
- Treatments management;
- Assembling of parts and groups;
- Quality control.

Main sectors served

- Woodworking machineries;
- Packaging machines and lines;
- Conveyor systems;
- Agriculture machines;
- Nautical;
- Urban Design;
- Fruit and vegetable sorting machines;
- Special machines;
- Refrigeration industry.

Processed materials

- Iron;
- Steels;
- Aluminium;
- Bronze;
- brass;
- Plastic materials;

Machines fleet

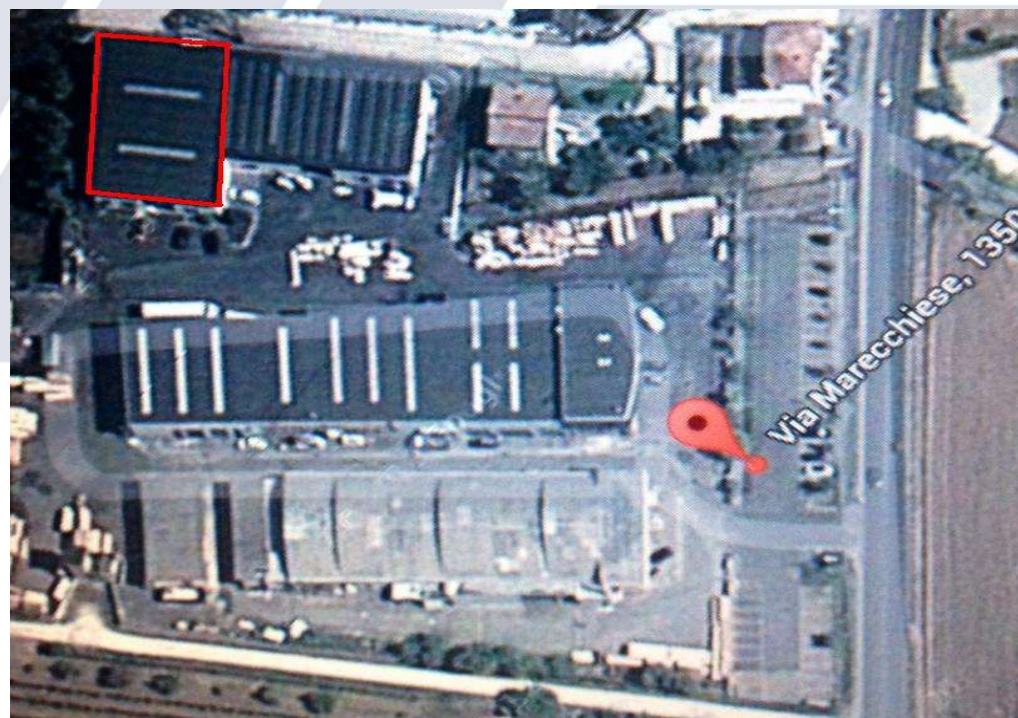

- n. 1 Vertical CNC 3 axes QUASER MV204C, working area: X=1.270 Y=700 Z=610;
- n. 1 Vertical CNC 3 axes QUASER MV204 II L/10, working area: X=1.020, Y=600 Z=610;
- n. 1 Vertical CNC 3 axes AERRE CL 4080 working area: X=900, Y=500 Z=600;
- n. 1 CNC Turning machine BIGLIA B750YS with Bar loader mod. X-FILES, bar passage 80mm, max diameter for secondary processing 380* mm;
- n. 1 CNC Turning machine BIGLIA B1000 with bar loader TOP AUTOMAZIONI;
- n. 1 CNC Turning machine DMG Mori NLX 2500SY/700 (2023) with bar loader TOP AUTOMAZIONI mod. X-FILES, bar passage 80mm, max diameter for secondary processing 380* mm;

The various traditional machines and equipment are added to the above machines.

* To be confirmed in relation to the detail to be performed.

Contacts

- Phone: +39 0541 758711;
- Mobile: +39 338 3432136 for commercial and technical inquiries;
- E-mail: info@meccanicaspecializzata.it;
- For offer requests: offerte@meccanicaspecializzata.it;
- Address: Via Marecchiese 1350, 47822 Santarcangelo di Romagna (RN) - ITALY.
